

Back End Web Developer

About Us

Try The World (www.trytheworld.com) is a fast growing food e-commerce startup in New York City. The company works with celebrity chefs around the world to curate food boxes from a new country every 2 months, enabling discovery of international food and culture.

Founded in May 2013 by 2 Columbia University graduates, Try The World has been covered by the Wall Street Journal, Inc., TechCrunch, Fortune, CNN, NBC, Huffington Post, and more and has raised funds from strategic angel and institutional investors. Gourmet Food is the top growing category online. Our goal is to become the largest online seller of international food and cultural products.

Try The World is seeking a back-end web developer to work part-time/full-time on several key projects with the supply and marketing team, at our Flatiron-based office

Qualifications

- Knowledge of basic processes / phases of development, perform testing and execute “releases” of changes into live systems without impact to the live users.
- Understanding of HTML5, CSS2.1/3, JavaScript, ruby on rails, and/or python as well as a curiosity and excitement for new technologies
- Ember, Node.js, Postgresql, and experience with cloud platforms are a plus
- Solid understanding of cross-browser/platform issues and code solutions
- Ideally: Experience using Shopify / Chargify, Mail Chimp, Google Analytics, Optimizely and related platforms is a plus
- Strong communication skills, both verbal and written

Interested candidates should submit a resume to careers@trytheworld.com
